

Internet Safety: Children and the NET

Target Group:

Those who wish to gain a basic awareness of the safeguarding implications of information and communication technology when working with children and their families, from the statutory and voluntary sector.

Aims:

- To understand the development & range of information and communication technologies (ICT).
- Their use by children and young people.
- Their use by those who present a risk to them.

Objectives/Learning outcomes:

- Describe some of the developments in ICT.
- Demonstrate an understanding of how children and young people use ICT.
- Name the main areas of risk to children and young people in their use of ICT.
- Identify the main features of the legislation, guidance and procedures relevant to safeguarding children and young people within ICT.
- Describe some of the ways in which ICT is used by those who present a risk to children.
- Identify practice issues in relation to their work with children and young people or adults.
